

Multi-Engagement Statement of Work #929074

This Multi-Engagement Statement of Work (“**SOW**”) is entered into by Google LLC (“**Google**”) and the contractor identified below (“**Contractor**”). This SOW is issued under the Inbound Services Agreement between Google and HCL Technologies Corporate Services Limited dated April 4, 2017 (Simba ID: 787652), as amended (collectively, the “**ISA**”), including the Software Engineering Services Worktype Exhibit (“**Worktype Exhibit**”) dated October 16, 2020 (Simba ID(s): 686125).

- A. The ISA’s defined terms apply to this SOW unless this SOW expressly states otherwise.
- B. All references to Services and Deliverables below are restricted to the Services and Deliverables under this SOW, and not those under any other statements of work.
- C. The terms in the ISA (including the Worktype Exhibit) will take precedence over conflicting terms in this SOW, unless the parties expressly agree in this SOW to supersede specific provisions of the ISA.
- D. For this SOW, Contractor (and its Point of Contact) will work with the Google Point of Contact listed below.
- E. **No Services may be performed until Google and Contractor sign this SOW, Contractor agrees to the applicable Order Form (defined below), and Google issues a valid purchase order for the applicable Order Form.**

1. Contractor	Full legal name:	HCL Technologies Corporate Services Limited
	<i>Point of Contact name:</i>	Bharathiraja Ramachandrabose
	<i>Point of Contact email:</i>	bharathiraja.ramac@hcl.com
2. Google	<i>Point of Contact name:</i>	Head of Engineering Services, Cloud VMO
	<i>Point of Contact email:</i>	cloud-vmo-eng@google.com
3. SOW Term	“SOW Effective Date”	The date Google signs this SOW
	“SOW End Date”	Three years after Google signs this SOW
	Unless terminated earlier in accordance with the ISA, the SOW will begin on the SOW Effective Date and end on the SOW End Date.	
	The terms of the Agreement will continue to apply to any active Order Form until the end of the last Inspection Period for Services and Deliverables under the Order Form, but no Order Forms may be added or renewed under this SOW	

	after the SOW End Date.
Worktype	The Worktype Exhibit for the following Worktypes will apply to this SOW: Software Engineering.

4. Services and Deliverables. Contractor will provide the following Services and Deliverables to Google, which may be selected from the workflows set forth on SOW Exhibit 2 (Available Services and Deliverables):

4.1 Service Ordering and Descriptions. This SOW establishes a framework under which Google may order specific Services from Contractor as described in separately issued order forms referencing this SOW (each, an “**Order Form**”).

(A) Order Forms.

- (1) Format. Each Order Form will be governed by the terms of the Agreement and will be in a format similar to Exhibit 1 (Order Form Template).
- (2) Order Form Services. The Order Form will identify the specific Services and Deliverables, Services term, Services location, fees (including roles, if applicable), expenses, maximum total cost for that Order Form, and additional service level requirements (if applicable).
- (3) Offer and Acceptance. Each Order Form issued to Contractor by Google is an offer to order Services under the terms of the Agreement. Each such Order Form will become effective as of the Order Form’s stated effective date following signature by Contractor and Google.
- (4) Order Form Term. Unless terminated earlier in accordance with the Agreement, the term of each Order Form will begin on the Order Form’s stated effective date and end on the later of: (1) the Order Form’s stated end date (which may not exceed 3 years from such effective date) or (2) the end of the last Inspection Period for Services under the Order Form.
- (5) Order of Precedence. This SOW applies only to Order Forms that reference this SOW, and not to other Order Forms. Except as otherwise expressly agreed in this SOW, the following order of precedence applies to the extent of any conflict: (1) the ISA; (2) this SOW; and (3) the applicable Order Form. An Order Form’s terms will not apply to the extent they add to or otherwise change the ISA’s or SOW’s terms regarding intellectual property, representations, warranties, indemnities, liability, termination, confidentiality, or data protection.

- (6) Available Service and Deliverables. The Services and Deliverables under the Order Form may be selected from the list of options in Exhibit 2 (Available Services and Deliverables).

(B) Service Reporting. Contractor will provide accurate written progress reports each month describing for each Order Form, in a format reasonably acceptable to Google: (1) the status of the Services and Deliverables provided; and (2) the total fees accrued.

4.2 Services Location. Contractor will provide the Services from the following location(s) as identified in the Order Form (and any other locations that Google approves in writing):

x Contractor's own facilities in:

Location	Type	Address
CA, USA	VOVO	9th floor 400 Capitol Mall, Sacramento, CA, 95814, USA.
Bangalore, India	VOVO	Manyata Embassy Business Park – SEZ C4 Block, HCL – A & B Wing, C4 Block, Outer Ring Road, Nagavara & Rachenahalli Villages, KR Puram Hobli, First Floor, C4 Block, Bangalore, Karnataka, 5600045, India.
Krakow, Poland	VOVO	O3 Business Park 112, Opolska 4, Krakow, Małopolskie, 31-323, Poland.
Noida, India	VOVO	Noida, Sector 126, SEZ, 2nd Floor, Tower 6, ODC1, Noida, Uttar Pradesh, 201304, India.

* VOVO: Vendor operated, vendor occupied

- x Google/Google affiliate-operated, vendor-occupied (“GOVO”) facilities in: [go/localofficesites](#)
- x Other: Remote.

4.3 Contractor Provision of Equipment. Contractor is responsible for providing all equipment necessary for Personnel to perform Services, except where otherwise provided by Google at its discretion, including for security purposes.

4.4 Test Devices. Contractor will comply with Exhibit 5 (Test Devices) to the extent Google provides test devices for Contractor’s use in connection with the Services.

5. Payment.

5.1 Fees and Invoicing. After Google accepts the applicable Services and Deliverables, Contractor will invoice Google in accordance with the fees and fee model indicated in the applicable Order Form. The available fee models include:

- (A) Billable Hours. Contractor will invoice Google for Billable Hours (as defined in WTE Simba ID 686125), which will not exceed the applicable standard hourly rates in Exhibit 6 (Rate Card). Rates are subject to increase for any adjustment made due to Premium rates (as defined in WTE Simba ID 686125) or Public holiday. All the Rates provided are exclusive of Taxes and duties such as VAT, GST, business tax, sales and use tax, service tax, lease tax, custom duty and all similar taxes and duties. Impact of withholding tax is not included in the prices and it is assumed to be borne by Google.
- (B) Flat Fee. Contractor will invoice Google a flat fee for completing all Services and Deliverables.
- (C) Milestone Fees. Contractor will invoice Google for completing specific milestones or Deliverables as described in the Order Form.
- (D) Price Per Unit ("PPU"). Contractor will invoice Google per portion of completed Services accepted by Google as described in the Order Form.
- (E) Subject to the Section 8.10 of WTE (Simba ID 686125) (Economic Change Adjustment), any ECA adjustments to this SOW will be mutually reviewed and made effective through a change order or amendment to this SOW. Contractor will present a proposal for ECA adjustment for Google's review at least 3 months prior to the anniversary of the SOW Effective Date. The ECA will apply subject to the productivity improvement being equal to or higher than the ECA applicable for the year. For example: If the ECA in India is 4.5%, productivity improvement must be 4.5% or higher.

5.2 Expenses.

- (A) If the Order Form expressly permits Contractor to invoice Google for expenses, then Google will reimburse Contractor's pre-approved, out-of-pocket expenses, subject to the ISA's applicable section regarding expenses and any caps set in the Order Form. Notwithstanding any expense amounts in the Order Form, the maximum reimbursable amount for expenses under this SOW will not exceed 15% of the cap in SOW Section 5.3(A)(Cap).
- (B) Otherwise, Contractor's expenses are included in the fees in SOW Section 5(A) (Fees and Invoicing) and no other expenses will be reimbursed.

5.3 Maximum Total Cost.

(A) Cap. The total invoiced amount (including expenses) under this SOW (including all Order Forms) will not exceed the following cap:

x the aggregate maximum total cost caps under all Order Forms.

(B) Taxes. This cap and each maximum total cost cap in each Order Form

x excludes Taxes.

6. **Service Levels and Credits**. Contractor will meet the performance requirements and issue any applicable credits as set forth in Exhibit 3 (Service Levels and Credits)

7. **Operations Manual**. Contractor will develop, maintain, and comply with an up-to-date and comprehensive written operations manual describing the parties' communication, reporting, and governance procedures relating to the Services. The operations manual will be subject to review and approval by Google. The parties will also establish a formal governance program for the Services as described in Exhibit 4 (Governance Cadence).

8. **Investment Commitment**. Contractor will provide the investment commitments described below only for those Order Forms issued referencing this SOW for Google Cloud workflows in its performance of Services, in addition to any other commitments in the Agreement.

Investment Name	Description	Commitment
Transition Services.	For transition activities (i.e. Services being transitioned from a current supplier to Contractor), Contractor will be responsible for all costs associated with initiation of such project, including new hire planning, knowledge transfer, and transition plans.	<p>Eight weeks of transition services provided at no cost to Google. Exit criteria and any transition timelines over or under this timeline will be agreed upon mutually in the Order Form.</p> <p>Contractor will not begin billing for any Services until Google provides written acceptance of exit criteria established by Google.</p>

<p>Account management support functions.</p>	<p>Provide the following Services:</p> <ul style="list-style-type: none"> • One Dedicated Point of Contact in the US. • Dedicated delivery team leads for all workflows with at least 25 Personnel. <p>In addition, Contractor will, at no cost to Google to ensure the adequate management of the account and provide support to the day to day functions:</p> <ul style="list-style-type: none"> • Hiring and onboarding status/management. • Staffing and Service Level reviews and updates. • Project planning and status updates. • Training updates. • Escalations. <p>Overall Project Management Activities.</p>	<p>Provide at no cost to Google.</p>
<p>Operation.</p>	<p>Contractor will ensure Service provision continuity.</p>	<p>Contractor will ensure at all times that it maintains appropriate staffing levels of onboarded and trained Personnel to provide the Services at the agreed upon levels and timelines as required in this SOW, including ensuring staffing levels are adjustable (at least 10% of the number of Personnel Contractor requires to provide the Services) to maintain continuity of the provision of Services.</p>

<p>Productivity Improvements.</p>	<p>During the SOW Term, Contractor will become increasingly proficient in its performance of the Services. As a result, Contractor will provide at least 10% productivity improvements year over year measured as either: reduced Contractor Staff or fees for the same volume; or, the same Contractor Staff for a higher volume of services or savings as mutually agreed between both parties. Contractor may drive price productivity through a combination of higher offshoring, right shoring, proficiency, automation, tools, and process engineering. For workflows where Google agrees that Contractor cannot improve productivity through proficiency alone, Contractor will work with Google to identify additional productivity measures to deliver the productivity improvements. If Contractor and Google are unable to identify productivity measures, or Google elects not to implement productivity measures, the annual productivity commitment will be adjusted as agreed between the parties. Any variation to the productivity commitment will be agreed between the parties and specified in an amendment to this SOW.</p> <p>Annual Calculation. Contractor will demonstrate productivity improvements to Google annually by comparing cost</p>	<p>Productivity: At least 10% improvement commencing 1 year from the SOW Effective Date for an Order Form with a term exceeding 12 months. Productivity improvements are applicable to workflows with a size of 10 Personnel or greater. For workflows with less than 10 Personnel, the feasibility of applying productivity improvements will be assessed by Contractor on a quarterly basis, and a plan presented to Google to implement such plans. If such implementation is not feasible as determined by Contractor with Google approval, Contractor will continue to use reasonable efforts on a not less than quarterly basis to implement productivity improvements at an individual or aggregate workflow level.</p>
-----------------------------------	--	--

	<p>per transaction annually on the anniversary of the SOW Effective Date . Annual calculation method will be mutually agreed and defined between Google and Contractor.</p> <p>The mechanism and baseline for measuring productivity improvements and/or savings will be mutually agreed between the parties.</p>					
SOW Volume Discount.	<p>Contractor will provide Google with a rebate or service credits based on the Incremental fees paid to Contractor during each calendar year under this SOW ("Volume Discount").</p> <p>This Volume Discount" will be calculated at the end of each calendar year by multiplying that single calendar year's Incremental Spend by the Discount Percentage.</p> <p>"Incremental Spend" means fees paid by Google for any net new Services under this SOW and explicitly called out in the Order Form, calculated after deducting any Service Level Credits and other credits (other than the service credits or rebates under this Section), discounts, taxes, pass through expenses and disputed amounts.</p>	<p>In addition to the standard Enterprise Rebates (as set forth in the Amendment 4 (Simba ID 1472494) to the ISA, "Enterprise Partner Program") the Contractor shall apply a Volume Discount for the Incremental Spend as detailed in the table below :</p> <table><tr><th>Incremental Spend</th><th>Discount Percentage</th></tr><tr><td>>=\$4M USD</td><td>1%</td></tr></table>	Incremental Spend	Discount Percentage	>=\$4M USD	1%
Incremental Spend	Discount Percentage					
>=\$4M USD	1%					
Innovation.	<p>Contractor will identify, analyze, and recommend initiatives to add value to the Services beyond the scope defined in this SOW. Both parties will mutually agree on scope and timelines.</p>	<p>Minimum Innovation Value: 4.5% of Total Spend (as set forth in the Amendment 4 (Simba ID 1472494) to the ISA, "Enterprise Partner Program").</p>				

	<p>Contractor will implement the initiatives on Google's approval.</p> <p>Contractor's initiatives must provide at least the Minimum Innovation Value.</p>	
Tangible Additional Value Commitments.	<ol style="list-style-type: none"> 1. Contractor will ensure Personnel are Google Cloud Platform (GCP) certified after one year. 2. Invest in finding feasible facilities and commercially reasonable operational support (example-fetching and negotiating with realtors, assisting in evaluate vendor quotes, etc)setting up new VOVOS in the USA (Sacramento and Austin), Mexico (Mexico City) and India (Bangalore, Chennai, Hyderabad, and Noida). 	<ol style="list-style-type: none"> 1. Google and Contractor will jointly agree on the specific Workflow and/or Order Forms and/or roles that require the certification. 2. Based on forecasted Services and together with Google, by jointly agreed plans. The charges for VOVO seats will be invoiced to Google in accordance with ISA and are not part of the investment offered.

9. Special Terms. The following special terms apply to this SOW:

The parties agree that if Contractor subcontracts any part of the Services to an entity in India, then the services provided by such Indian entity to Contractor qualify as export of services not subject to India taxes (including the India Goods and Services' Tax). Accordingly, the Contractor will not pass any such taxes to Google.

9.1 Termination for Convenience.

In addition to Google's other termination rights in the ISA, Google may terminate for convenience:

- (A) this SOW (including all Order Forms) on 30 days' prior written notice; and
- (B) any Order Form on 30 days' prior written notice.

9.2 Termination Assistance. As part of or in addition to any transition or exit Services under the Agreement, on request by Google at or prior to the expiration or termination of the SOW or any Order Forms, Contractor will provide to Google or to its designee (collectively, "Successor") commercially reasonable assistance to allow the Services designated by Google to continue without material interruption or adverse effect and to facilitate the orderly transfer of the Services to the Successor ("**Termination Assistance**").

(A) Duration of Termination Assistance. Contractor will provide the Termination Assistance for a period of up to 6 months (or such longer period as agreed by the parties) following the termination or expiration date of this SOW or the applicable Order Forms (such period, the "Termination Assistance Period"). The terms of the Agreement will continue to apply (including Google's payment obligations) during the Termination Assistance Period.

(B) Personnel and Service Quality. As part of Termination Assistance, Contractor will: (1) provide such information as Google may reasonably request relating to the number and function of Personnel performing Services; and (2) not make any material changes to the level of Service, except in connection with an agreed decrease in the volume of Services provided.

(C) Applicable Fees. The fees for Termination Services will not exceed the fees stated in the SOW for the applicable Services. No additional fees or other charges will be charged to Google in connection with any termination under this SOW or Order Forms, unless otherwise agreed between the Parties.

(D) Provision of Information. By the end of the Termination Assistance Period (or earlier, if requested by Google), Contractor will provide to Google: (1) all Google data in such electronic format as may reasonably be requested by Google; and (2) all current operational documentation used to provide the Services, including the most current version of any policies and procedures manuals developed for use under this SOW, a list of all assets used in providing the Services, and all software license documentation and related materials.

If you are signing on behalf of your company, you represent and warrant that you:
(1) have full legal authority to bind your company to these terms and conditions;
(2) have read and understood the ISA and this SOW; and
(3) agree to this SOW on behalf of your company.

If you do not have the legal authority to bind your company, do not sign this SOW.

Signed by the parties’ authorized representatives on the dates below.

Available Services and Deliverables

1. **Workflows.** Contractor will provide the following Services, consisting of the following workflows, which together create a center of excellence for Cloud core capabilities (“C3”) for the software engineering Services for Google Cloud operations. The following chart provides a description of each such C3 workflow:

Workflow	Services Description
Application Maintenance & Support	<p><u>Description:</u> Software engineering support and maintenance services for multiple Cloud software engineering teams.</p> <p>Support includes fixing bugs with reactive development and maintenance includes proactive development in implementing additional features or triaging low priority bugs that do not deteriorate the software design and user experience.</p> <p><u>Tasks:</u> Contractor will perform the following tasks and any others identified in the applicable Order Form:</p> <p><i>Corrective Maintenance:</i> Includes correcting user reported errors in source code. It focuses on low priority bugs and is commonly regarded as triaging enhancement requests rather than fixing defects.</p> <p><i>Preventive Maintenance:</i> Includes taking preventive measures to ensure software continues running without a reduction in performance as it should and per defined Google requirements. It focuses on decreasing the likelihood of unanticipated effects of evolving operating systems and devices on which the software runs.</p> <p><i>Perfective Maintenance:</i> Includes engineering after delivery to elevate the functionality and performance of the software. It accounts for the implementation of new features based on user submissions.</p> <p><i>Adaptive Maintenance:</i> Includes updating code in one part of the software due to external problems in another part of the system. It is necessary when issues are caused by changes to the operating system, software</p>

	<p>dependencies, hardware, or business policies that require changes to the codebase.</p> <p><u>Deliverables:</u> Contractor will provide documentation and results of any of the following. The list is non-exhaustive any additional tasks will be mutually agreed upon in each Order Form</p> <ul style="list-style-type: none"> • Creation of Service Operation Procedures (SOP) manual(s). • Identify root causes of issues. • Fix root causes of issues. • Managing communication with customers via email / chat / buganizer / other. • Escalating issues using appropriate Google tools/systems. • Capturing and managing information used for ticket resolution. • Handle incoming customer service and provisioning of tickets in Google Cloud Systems Tools/Products according to Google compliance standards. • Respond to customer inquiries via email / chat / buganizer / other. • Creation of daily / weekly / monthly / quarterly / annual reports.
Test Engineering	<p><u>Description:</u> Release management, quality assurance (“QA”), and test engineering services for Google Cloud test engineering teams.</p> <p>Release management refers to the process of planning, designing, scheduling, testing, deploying, and controlling software releases. It ensures that release teams efficiently deliver the software and upgrades required by Google while maintaining the integrity of the existing production environment.</p> <p>QA refers to the ongoing process that ensures an application meets and complies with Google’s established and standardized quality specifications.</p> <p>Test engineering refers to the process of evaluating a software product to find whether it meets the required conditions or not. The testing process involves evaluating the features of the software product for requirements in terms of any missing requirements, bugs or errors,</p>

	<p>security, reliability, and performance. Activities for test engineering involve the execution of software components using manual or automated tools to evaluate one or more properties of interest.</p> <p><u>Tasks:</u> Contractor will perform the following tasks and any others identified in the applicable Order Form:</p> <ul style="list-style-type: none"> • Acceptance testing: Verifying whether the whole software works as intended. • Integration testing: Ensuring that software components or functions operate together. • Unit testing: Validating that each software unit performs as expected. • Functional testing: Checking functions by emulating business scenarios, based on functional requirements. • Performance testing: Testing how the software performs under different workloads. • Regression testing: Checking whether new features break or degrade functionality. • Stress testing: Testing how much strain the system can take before it fails. • Usability testing: Validating how well a user can use software to complete a task. <p><u>Deliverables:</u> Contractor will provide documentation and results of the following. The list is non-exhaustive any additional tasks will be mutually agreed upon in each Order Form</p> <ul style="list-style-type: none"> • Manual testing. • Automated testing. • Competitive analysis. • Written scripts to automate testing. • Tools that Google engineers can use for testing their own code. • Performing investigation in regression suite failures. • Triaging failures to the Google team. • Manual releasing of workflows. • Automated releasing of workflows. • Development of manual tests. • Development of automated tests. • Improvement of testing process and/or methodologies. • Optimizing testing tools and/or tests to increase productivity.
--	--

		<ul style="list-style-type: none"> • Tracking of bugs. • Debugging and triaging of tools to the Google team. • Tracking bug closure. • Fixing bugs. • Generate and execute testing playbooks. • Scripting tasks to improve logging, fixing of bugs or improvement in automation suites. • Document processes, playbooks, workarounds, feature documentation, and similar issues. • Creation of daily / weekly / monthly / quarterly / annual reports.
Product Management	Lifecycle	<p><u>Description:</u> Provide end-to-end design, development, QA, and technical support services and technical program management support.</p> <p>Product lifecycle management includes the process of managing the entire lifecycle of a product from its conception, through design and build, to service and disposal.</p> <p><u>Tasks:</u> Contractor will perform the following tasks and any others identified in the applicable Order Form:</p> <p><i>Designing:</i> Accurately design the proper requirements and specifications of an application in a timely cost-effective approach.</p> <p><i>Procurement:</i> Keeping high visibility of the supply chain required to build the product to ensure an efficient and effective collaboration with required suppliers.</p> <p><i>Building:</i> Project scoping to create a schedule of release and ensure an accurate delivery of Services and materials required. It also entails an accurate review of costs of the project and product to keep it within the budget.</p> <p>Operation: Keeping adequate design procedures, access to manuals, and adequate information about the product to ensure adequate use and facilitate maintenance activities.</p> <p><u>Deliverables:</u> Contractor will provide documentation and results of the following. The list is non-exhaustive any additional tasks will be mutually agreed upon in each Order Form</p>

	<ul style="list-style-type: none"> • Ensure program processes and policies are followed during the execution of services. • Development build and deployment of structure. • Testing and fixing of bugs (manually or automated). • Web development. • Content creation. • Software analysis work. • Software architecture work. • Software design work. • Providing guidance related to software analysis, software architecture, software design, application development and security, data migration and/or DevOps. • Application development. • Validate builds and upgrades. • Verifying incoming code changes. • Incremental delivery of releases. • Participating in sprint demos, reviews, and retrospectives. • Project management activities. • Project coordination activities. • Triaging and management of bugs and issues. • Triaging of pull requests. • Manual and/or automated testing of proposed changes. • Planning, analysis, design and implementation activities to complete assigned projects. • Develop project documentation. • Daily / weekly / monthly / quarterly / annual reports.
Internal Development	<p><u>Description:</u> Build applications that will be used by internal Google teams to serve their customers.</p> <p><u>Tasks:</u> Developing internal software involves the following activities. Contractor will perform the following tasks and any others identified in the applicable Order Form</p> <ul style="list-style-type: none"> • Selecting a methodology to establish a framework in which the steps of software development are applied: It describes an overall work process, lifecycle or roadmap for the project. Example: Agile development. • Gathering requirements to understand and document users' and other stakeholders' needs. • Choosing or building an architecture as the underlying structure within which the application will operate.

	<ul style="list-style-type: none"> • Developing a design around solutions to the problems presented by requirements, often involving process models and storyboards. • Building a model with a modeling tool that uses a modeling language to conduct early validation, prototyping and simulation of the design. • Constructing code in the appropriate programming language. Involves peer and team review to eliminate problems early and produce quality applications faster. <p><u>Deliverables:</u> Contractor will provide documentation and results of the following. The list is non-exhaustive any additional tasks will be mutually agreed upon in each Order Form</p> <ul style="list-style-type: none"> • Designing, building, testing, implementing, deploying, monitoring, releasing and maintaining dashboards, databases and/or features for Google products and services. • Development of code in different programming languages, as needed. • Track progress of assigned requests in tools such as buganizer. • Identifying issues. • Resolving issues. • Development of new features. • Development and testing of any software components and libraries requested by Google. • Enhancement of new features. • Product bug fixing and code reviews. • Listing of bugs and bug fixes. • Unit tests supporting changes and new components. • Create and maintain test plans, test cases/test protocol, requirements traceability, and test reports. • Providing support for launch and management of software functionalities. • Contribute to ongoing development and maintenance of Google products and services. • Creation of project design documentation. • Creating and delivering technical design documents. • Daily / weekly / monthly / quarterly / annual reports.
--	--

External Development	<p><u>Description:</u> Integration and maintenance of new and existing connectors for third party tools.</p> <p>Integration includes the process of bringing together various types of applications sub-systems so that they create a unified single system. It ensures that each integrated subsystem functions as required.</p> <p>Maintenance includes proactive development in adding additional features or triaging low priority bugs that don't deteriorate the software design and user experience.</p> <p><u>Tasks:</u> Developing external software involves the following activities. The Contractor will perform the following tasks and any others identified in the applicable Order Form</p> <ul style="list-style-type: none"> • Selecting a methodology to establish a framework in which the steps of software development are applied: It describes an overall work process, lifecycle or roadmap for the project. Example: Agile development. • Gathering requirements to understand and document other users' and stakeholders' needs. • Choosing or building an architecture as the underlying structure within which the application will operate. • Developing a design around solutions to the problems presented by requirements, often involving process models and storyboards. • Building a model with a modeling tool that uses a modeling language to conduct early validation, prototyping, and simulation of the design. • Constructing code in the appropriate programming language. Involves peer and team review to eliminate problems early and produce quality applications faster. <p><u>Deliverables:</u> Contractor will provide documentation and results of the following. The list is non-exhaustive any additional tasks will be mutually agreed upon in each Order Form</p> <ul style="list-style-type: none"> • Design, development, testing, and deployment of new and existing data connectors and their features. • Design and implement state of the art privacy, security, and access control aware solutions.
-----------------------------	--

	<ul style="list-style-type: none"> • Maintain and optimize features/connectors to improve efficiency and scale. • Creation and maintenance of documentation for any design and development work. • Feature request triage of incoming feature requests. • Triage of incoming bugs. • Investigate and debug issues raised by customers. • Process management including bug submission, tracking, and reporting to the Google team. • Implementing data connectors using the infrastructure as finalized by the Google Cloud team. • Adding unit test cases for every new or changed function. • Conducting end to end testing (manual or automated). • Development of code in different programming languages, as needed. • Track progress of assigned requests in tools such as buganizer. • Identifying issues. • Resolving issues. • Bug fixing and code reviews. • Listing of bugs and bug fixings. • Unit tests supporting changes and new components. • Create and maintain test plans, test cases/test protocol, requirements traceability, and test reports. • Providing support for launch and management of software functionalities. • Creation of project design documentation. • Creating and delivering technical design documents. • Daily / weekly / monthly / quarterly / annual reports.
Business Intelligence	<p><u>Description:</u> Build, update, integrate, and maintain content for data visualizations.</p> <p>Business Intelligence (“BI”) refers to the process of leveraging technologies, applications and practices for the collection, integration, analysis, and presentation of business information. Such business information can be used by Google in its strategic and decision-making processes.</p>

	<p><u>Tasks:</u> BI activities include running scripts [example: run Structured Query Language ("SQL") queries against data] performing the following. The Contractor will perform the following tasks and any others identified in the applicable Order Form</p> <ul style="list-style-type: none"> • Automate workflows for the update of dashboards. • Create alerts to detect anomalies on datasets. • Integrate scripts and dashboards across different internal tools to consolidate and visualize information. • Provide maintenance to the scripts, dashboards and workflows to ensure proper functionality. <p><u>Deliverables:</u> Contractor will provide documentation and results of the following. The list is non-exhaustive any additional tasks will be mutually agreed upon in each Order Form</p> <ul style="list-style-type: none"> • Extract, analyze, and audit data using tools and applications such as SQL, SQL-based dashboards, Google Spreadsheets, and buganizer, as requested by Google. • Create, organize, and maintain data visualization dashboards and reporting in Google tools. • Drive automation of analysis and reporting workflow, writing macros, and leveraging existing database environments. • Audit and maintain delivery performance reports. • Produce reporting with accurate data, metrics, analysis, trends and applied knowledge of measurement, statistics and program evaluation. • Create, organize and maintain documentation for existing processes. • Daily / weekly / monthly / quarterly / annual reports.
<p>Technical Program Management</p>	<p><u>Description:</u> Develop and implement program strategy and provide technical guidance and direction throughout the project lifecycle.</p> <p>Technical project management Services include the process of leading the work of a technical team to achieve all project goals within the given constraints.</p> <p><u>Tasks:</u> Contractor will perform activities necessary to complete the technical program management Services, including the following task and any others identified in the applicable Order Form:</p> <ul style="list-style-type: none"> • Scoping and managing a project.

	<ul style="list-style-type: none"> • Defining clear goals. • Tracking a project from start to finish. • Delivering a project on time and on budget. • Coordinating with other related teams. • Developing sprint plans and team KPIs. • Risk, issue and opportunity management. <p><u>Deliverables:</u> Contractor will provide the following. The list is non-exhaustive any additional tasks will be mutually agreed upon in each Order Form:</p> <ul style="list-style-type: none"> • Creation of project management plans, work breakdown structures, and charter(s). • Project management artifacts as assigned by Google, including meeting minutes, sprint reviews and post-mortems.
Transition Management.	Described in Section 2.1 (Transition Management Activities) of this Exhibit.
Intake Management.	Described in Section 2.2 (Intake Management Activities) of this Exhibit.
Post Transition Management / Post Intake Management.	Described in Section 2.3 (Post Transition Management / Post Intake Management Activities) of this Exhibit.

2. **Additional Support Workflow Descriptions.** In connection with the performance of the C3 workflows, Contractor will perform the following activities to support implementation and performance of the C3 workflows.

- 2.1 **Transition Management Activities.** In connection with implementing the C3 workflows, Contractor will provide Services to replace services previously provided by other suppliers, as described in the table below. Contractor will evaluate and understand the status of services for Google Cloud provided by incumbent suppliers and Contractor will perform appropriate activities required to absorb such work as efficiently and quickly as possible to avoid any disruptions to Google's business. Transition activities will not be billable when requested by Google unless otherwise specified in the applicable Order Form.

General Responsibilities	Specific Activities
Understand the scope of work performed by incumbent suppliers	Scope assessment, gap analysis, solutioning, and operational improvements for each work

(map of “AS IS” and definition of “TO BE”) and the resources needed to fulfill the business requirements.	type to transition, including creation of documentation, manuals, and standard operating procedures.
Define transition strategy without business disruptions and governance.	<p>Set up a standardized process to receive, understand and provide responses to existing business requirements (“Transitions”).</p> <p>Contractor will manage multiple transitions at once in a centralized, automated form and have appropriate ownership of tasks involved in this stage, with minimum VMO involvement.</p> <p>Provide a clear transition plan that includes appropriate roles and responsibility mapping across all involved stakeholders, communication plan and reporting status updates between awarded supplier, incumbent supplier and Google Vendor Management Organization (“VMO”), activities for knowledge transfer and deadlines.</p> <p>Establish the appropriate cadence and communication channel to report ongoing progress to VMO to ensure broad visibility and allow for decision making and addressing roadblocks.</p>
Execute the transitions.	Executing multiple parallel transitions and ensuring business continuity and seamless transition, ensuring no gaps or degradation of service quality.

- 2.2 Intake Management Activities. Contractor will develop and implement a process to intake any new requirements identified by Google under the indicated workflow and complete the requirements under indicated timeframes as part of the initial engagement (“Engagement”) process. Contractor’s Services will include the following:

General Responsibilities	Specific Activities
Streamline the intake by defining the appropriate strategy to satisfy new	Set up a standardized process to receive, understand and provide responses to new

intake business requirements and provide a seamless experience for the requester.	business requirements ("Intake"). Contractor will manage multiple Intakes at once in a centralized, automated form and have appropriate ownership of tasks involved in this stage, with minimum VMO involvement.
Meet all identified requirements.	Manage hiring and productivity timelines to meet new Intakes with minimum VMO involvement.
Ensure Services meet all applicable SOW requirements and provide detailed reporting to Google.	Deliver both Intake and Services onboarded after the Intake. Contractor will establish an agreed cadence to report to VMO aspects such as: the scope of new Intakes, status of existing Intakes, potential roadblocks, onboarding, and support required from Google. Contractor will provide reporting regarding already onboarded Services to ensure business continuity.

- 2.3 Post Transition Management / Post Intake Management Activities. Upon completion of transition and any Intake activities, Contractor will provide continuity and quality of Services performed at the same quality as applicable services performed by the prior supplier. Contractor's Services will include the following:

General Responsibilities	Specific Activities
Establish appropriate reporting and governance.	Provide accurate reporting by individual workflows and globally against applicable KPIs, according to the Governance Cadence. Identify roadblocks and issues, proactively working to prevent them and solve them and avoid negative impact on the workflows.
Proactively engage with Google to ensure services quality and visibility.	Engage with Google to report on performance by worktype, change of scope (termination, reduction or augmentation of activities in specific workflows) and status of new and ongoing initiatives.

Provide innovative solutions for continuous improvement.	Engage in partnership with Google to provide creative solutions to the day to day requirements of business and the C3.
--	--

Exhibit 3
Service Levels and Credits

1. Applicable Service Levels and Credits at Risk.

- 1.1 Credits Cap. The Credit Cap for this SOW is 10%. The applicability of Service Levels and Service Level Credits will be assessed and applied separately for each Order Form.

2. Service Level Metrics and Weightages.

- 2.1 Net New Services. The following Service Levels will apply for net new Services not provided by Contractor prior to the Order Form Effective Date:

(A) Intake.

Description	Target	Tracked by	Service Level Credit Allocation
Time to production: Contractor's will start Service(s) in full at the agreed deadline	≥95% of all Services	Contractor	100% (i.e. if less than 95% of the capabilities required to start or components of the Service at the committed date are available, a Service Level Credit of 100% of the Credit Cap will apply)

(B) Transition.

Service Level Metric	Description	Minimum Target Value	Tracking frequency	Tracked by	Service Credit Level Allocation
Transition Enablement	Contractor will meet all transition milestones on time	95%	Monthly	Contractor	100%

2.2 Ongoing Services. The following Services Levels will apply for Services provided after any transition or Intake period:

Service Level Metric	Description	Minimum Target Value	Tracking Frequency	Tracked by	Service Credit Level Allocation
CSAT	Customer satisfaction survey score	90%	Monthly	Contractor	30%
Service Provision Continuity	Contractor will ensure at all times that it maintains appropriate staffing levels of onboarded and trained Personnel to provide the Services at the agreed upon levels and timelines as required in the Order Form (including as results from any departures or open roles), including ensuring staffing levels are adjustable (minimum of 10%) to maintain continuity of the provision of Services.	95%		Contractor	30%
Workflow based SLAs	Workflow based SLAs outlined in Order Forms*	90%		Contractor	40%

*Each Order Form will include at least 1 efficiency and 1 effectiveness Service Level with Service Level Credits. Google may choose these SLAs from the table under Section 2.3 (Workflow Based Service Levels). Minimum target levels can be modified at Order Form level according to the complexity of the services if mutually agreed in writing by both parties. A baseline period of 8 weeks for each Service Level will apply (unless otherwise approved by Google), including the measurement and performance against the Service Level.

2.3 Workflow Based Service Levels.

Type of Metric	Metrics	Description	Minimum Target Value	Tracked by
Efficiency	Milestone Attainment	% of milestones completed within agreed timeline	Defined at Order Form level	Contractor
		% of projects completed on time	>90%	
	Throughput	# of processes deployed / features released	Defined at Order Form level	
		# of story points developed		
		% stories reviewed & approved for implementation	> 90 %	
		% of changelists with bug attached		
	Velocity	% of bug acceptance (service level objective)	> 90 %	
		delta between current and average velocity planned per sprint	< 25%	
	Testing Coverage	% of integration test coverage	>75%	
		% of user interface test coverage		
		% of critical user journeys approved and tested		
		% unit test coverage	>90%	
		% regression test coverage		

Effectiveness	CL Quality	% changelist pass rate: change lists with < 5 review rounds	>90%	
	Bug Triage	% bug resolution (service level objective)	>90%	
	Uptime	uptime (minus planned downtime) for any application per month	> 99%	
		maximum duration of single outage	< 5 hrs	
	Defect Rate	% of bugs accurately identified as release-blocking or priority level 0 (P0)	> 95%	
		% of P0 defects tested leaking into production	< 1%	

3. **KPIs.** The following KPIs will apply to the Services. Contractor will report these as health metrics during regular business reviews with Google at predefined frequency or as per Exhibit 4 “Governance Cadence”:

KPI	Description	Minimum Target Value	Tracking Frequency	Tracked by
Response to business Intakes	Business profile and fulfillment completion time shared with VMO within 2 business days of intake request	95%	Monthly	Contractor
Ontime invoice submission rate	Number of invoices submitted on or before cutoff date / Total invoices to be submitted	>95%	Monthly	Contractor
Invoice defect rate	Defects in the invoice(s) submitted / total invoices submitted	≤5%	Monthly	Contractor
Completion of required Compliance Courses	Number of courses completed before cutoff date / Total courses count	100%	Monthly	Contractor

Overall Services Level Capabilities	Minimum capabilities required for Contractor's performance of the Services	At time of assignment (for applicable Order Forms): >80% of Personnel assigned to perform Services should be GCP certified >80% of Personnel assigned to perform Services should be Google Stack ready >75% of Personnel assigned to perform Services should be onboarded and trained already	Monthly	Contractor
-------------------------------------	--	--	---------	------------

4. Example Scenarios.

4.1 Intake:

- Time to Production: Contractor commits to fully start the services on a specific date (Month xx, day xx), but due to delays that are Contractor's responsibility, the services starts at 80% capacity only.

Maximum Service Level Credit Cap will be applicable.

Credit Cap: 10%

Assuming a \$10,000 monthly invoice:

10,000 USD x 10% = \$1,000 USD Service Level Credit

4.2 Transition Enablement:

- Transition plan will take 6 months to be completed. Each month has a specific number of milestones.

Example:

Contractor misses the minimum target of 95% of milestones on time in month 1 and month 3 (minimum target was reached successfully on time in month 2, 4, 5 and 6)

Only month 1 and month 3 will be subject to Service Level Credits as follows:

Credit Cap: 10%

Assuming a \$10,000 monthly invoice:

Maximum Service Level Credit Cap will be applicable.

10,000 USD x 10% = \$1,000 USD

\$1,000 USD of Service Level Credits applied in month 1 and \$1,000 USD of Service Level Credits applied in month 3.

- 4.3 Ongoing Services: A steady state Service in which Contractor reached the minimum target in only two out of three SLAs:

Service Level Metric	Description	Minimum Target Value	Did Contractor reach Minimum Target Value?	Weightage (% of max credit cap)	Overall attainment
CSAT	Customer satisfaction	≥90%	Yes	30%	30%
Service Provision Continuity	Contractor will ensure continuity of the provision of Services at all times.	≥95%	No	30%	0%
Worktype based SLAs	Applicable Workflow Metrics**	≥90%	Yes	40%	40%

Overall Attainment: 70%

Missed: 30%

Credit Cap: 10%

Assuming a \$10,000 monthly invoice:

10,000 USD x 30% x 10% = \$300 Service Level Credit

Exhibit 4 Governance Cadence

In order to establish a formal governance program for the Services performed under this SOW, Contractor will promptly support Google requests to meet on the cadence and agenda in the governance table below.

Meeting	Agenda	Participants (G - Google, C - Contractor)	Frequency
Daily standup	Internal 15 min daily touch point with Program leads/Manager	G - Workflow managers C - Program leads, manager	Daily
Weekly Business Review (WBR)	Review project status, open items, risks, plan for next week, metrics and KPI	G - Workflow Managers C - Program leads, manager	Weekly
Monthly Business Review (MBR)	Review Monthly Program performance, ad hoc projects, progress on OKRs, key risks & issues, metrics and KPI	G - Workflow Managers, Program Manager C - Program Director, Account Manager, Program leads, managers	Monthly
Quarterly Business Review (QBR)	Review Quarterly Program/Project performance, ad hoc projects, progress on OKRs, key risks & issues, metrics and KPI	G - Workflow Managers, Program Manager, VM C - Program Director, Account Manager, Enablement Lead, Program leads, managers,	Quarterly
Ad Hoc Projects Review	Bi-Weekly/ad hoc meetings to discuss any immediate requirements, risks, issues,	G - Workflow Managers, Program Manager C - Program Director, Account Manager, Enablement Lead,	Ad-Hoc

	hiring plans.	Program leads, managers	
Quality Review	Connect with the Process excellence team to review the SLA, KPI, metrics performance, revisit the target baselines, discuss new performance measure	G - Workflow Managers, Program Manager C - Program Director, Enablement Lead, Program leads, managers	Monthly
Demand Review	Meeting to discuss the hiring and onboarding status, demand plans, discuss any risks, issues and support required	G - Workflow Managers, Program Manager C - Program Director, Enablement Lead, Program leads	Bi-Monthly
Risk Escalation Management	Ad hoc meeting with both internal and external stakeholders to review open risks, upcoming Audit readiness and any Escalations that require immediate attention	G - Workflow Managers, Program Manager, VM C - Program Director, Account Manager, Enablement Lead, Program leads	Monthly/Ad hoc
Ideation Factory	Meeting with the process excellence progress on automation, Dashboard changes	G - Workflow Managers, Program Manager C - Program Director, Process Excellence lead	Quarterly

Exhibit 5

Test Devices

1. **Test Devices.** Google may provide Contractor with test devices to allow Personnel to conduct testing, troubleshooting, and evaluation in connection with the Services ("**Test Devices**").
2. **Use and Maintenance.** Contractor will use the Test Devices solely within the designated Service locations identified in the applicable SOW. Contractor will use and maintain the Test Devices as follows (or as otherwise permitted by Google in writing):
 - 2.1 Test Devices will be issued and will remain (unless Google determines otherwise) without the ability to access Wi-Fi (other than "Google-Guest" or other public Wi-Fi in the location) and with the camera access turned off.
 - 2.2 Test Devices will only be used with "dummy" accounts, not personal or professional email accounts.
 - 2.3 Personnel will not access any private company or user data from the Test Devices.
 - 2.4 Contractor will collect the Test Devices at the end of each shift, or, in the case of 24/7 operations, will be re-inventoried at shift change each day.
 - 2.5 For non-24/7 operations, Test Devices will be collected and secured during non-business hours either:
 - (A) Behind a door with badged access, accessible only by Contractor management;
or
 - (B) Under lock and key, accessible only by Contractor management.
 - 2.6 In cases where Personnel do not need the Test Devices at their desks, Contractor may create a central display area in the common floor area where the Test Devices are tethered and alarmed.
3. **Loss or Damage.** Contractor will reimburse Google at the then-current market price for a new, identical Test Device for any loss of or damage to Test Devices caused by Contractor or Personnel.
4. **Confidentiality.** All Test Devices are Google Confidential Information.

Exhibit 6 Rate Card

The table below identifies the roles and rates that are associated with the Services described in this SOW:

Role ID	Role Title	Role Tier	Role Skill Type	Country	City	Location Type	Billable Hourly Rate	Monthly Billable Hours
NSC0001	SAP Consultant	I	Core	Argentina	Buenos Aires	GOGO/GOVO	\$26.85	160
NSC0005	SAP Consultant	II	Core	Argentina	Buenos Aires	GOGO/GOVO	\$35.81	160
NSC0009	SAP Consultant	III	Core	Argentina	Buenos Aires	GOGO/GOVO	\$44.76	160
NSC0013	BI Consultant	I	Core	Argentina	Buenos Aires	GOGO/GOVO	\$25.72	160
